

Voices In My Head

a percussive collection by billy hawn

this album is dedicated to the music fan; the artists that choose me to add color to their music, the companies that endorse what i do and most importantly, my family. *Voices In My Head* was born to allow a creative and artistic release of just a taste of the many snippets of rhythms and melodies that fill my head on a daily basis. throughout my years as a freelance drummer and percussionist, i have had the humbling privilege to work with and contribute to the music and inspiration of many great artists in various situations and environments. this album contains a little bit of everything inspired by those experiences; a ripening kaleidoscope of color, movement, imagery, organics, sound, rhythm and melody. everything you hear on this album was performed live in an organic fashion. no loops.

special thanks to
